Footnotes

- (1) The currently effective tariff rate is the sum of the base tariff rate and the applicable surcharges. To the extent Transporter discounts the maximum currently effective tariff rate, such discounts will be applied on a non-discriminatory basis, subject to the policies of Order No. 497.

A "Facility Cost-of-Service Charge," as defined in Section 19 of the General Terms and Conditions, is payable in addition to all other rates and charges if such a charge is included in Exhibit C to a Shipper's Transportation Service Agreement.

- (2) Rates for Rate Schedules FT-1 are also applicable to capacity release service. (Section 20 of the General Terms and Conditions describes how bids for capacity release will be evaluated.) The maximum reservation rates do not apply to capacity release transactions of one year or less that begin within one year of notification to Transporter.
- (3) The "Index Price" shall be set forth in this footnote and shall be equivalent to the lowest charge for unauthorized underruns and overruns charged by Northwest Pipeline GP or successor company delivering into Transporter's pipeline. This Index Price shall be changed from time to time to reflect any change in the charge by Northwest Pipeline GP or successor company delivering into Transporter's pipeline. The Index Price charged under this provision is \$5.00 per MMBtu.
